## Drug Facts

**COMPOSITION :** 7.5GM

**PHARMACOLOGICAL CLASS :**

Nadifloxacin is a fluoroquinolone antibiotic. It is used in the treatment of skin problems such as acne and infections. It is meant for external use only.

**NAME :** NADIFLOXACIN 10mg + MOMETASONE FUROATE 1mg + MICONAZOLE 20mg

**AVAILABLE AS :** NADIFA M2

**PHARMACOLOGICAL ACTION :** NADIFA M2 is a combination of three medicines: Miconazole, Mometasone and Nadifloxacin which treat skin infections. Miconazole is an antifungal which stops the growth of fungi while Nadifloxacin is an antibiotic which kills bacteria that cause skin infections. Mometasone is a steroid which blocks the production of certain chemical messengers (prostaglandins) that make the skin red, swollen and itchy.

**USED FOR :** treatment of skin infections

**SIDE EFFECTS :** Application site reactions (burning, irritation, itching and redness)

**WARNINGS :** as directed by physician.

**OUR ADVICE :** DO NOT SELF MEDICATE
