Drug Facts

COMPOSITION : 5GM

PHARMACOLOGICAL CLASS :

Mupirocin (pseudomonic acid A, or Bactroban or Centany) is an antibiotic originally isolated from *Pseudomonas fluorescens*. It is used topically, and is primarily effective against Gram-positive bacteria. Mupirocin is bacteriostatic at low concentrations and bactericidal at high concentrations.

NAME : MUPIROCIN 2%

AVAILABLE AS : MUST

PHARMACOLOGICAL ACTION : Must Cream is an antibiotic. It kills the bacteria that cause skin infections by preventing the synthesis of essential proteins necessary for survival of bacteria. Thus, it prevents the skin infection from spreading.

USED FOR : Must Cream is used in the treatment of bacterial skin infections

SIDE EFFECTS : Application site reactions (burning, irritation, itching and redness)

WARNINGS : as directed by physician.

OUR ADVICE : DO NOT SELF MEDICATE
