## Drug Facts

|   |   |
|---|---|
| <b>COMPOSITION :</b> Each film coated tablet contains<br>LEVOCETIRIZINE DI HCL 5 MG | <b>PHARMACOLOGICAL CLASS :</b><br>antihistamines. |
|---|---|

NAME : LEVOCETIRIZINE DIHYDROCHLORIDE 5 MG

AVAILABLE AS : LEVOCETIRIZINA

**PHARMACOLOGICAL ACTION :** Levocetirizine is an antihistamine. It acts as an inverse agonist that decreases activity at histamine H1 receptors. This in turn prevents the release of other allergy chemicals and increases the blood supply to the area, providing relief from the typical symptoms of hay fever.

**USED FOR :** LEVOCETIRIZINA (Levocetirizine) is used to relieve runny nose; sneezing; and redness, itching, and tearing of the eyes caused by hay fever, seasonal allergies, and allergies to other substances such as dust mites, animal dander, and mold.

**SIDE EFFECTS :** Common side effects of levocetirizine may include:

drowsiness, tiredness;  
sinus pain;  
ear infection;  
cough;  
fever;  
nosebleed;  
vomiting, diarrhea, constipation  
dry mouth; or  
weight gain.

**WARNINGS :** You should not use levocetirizine if you are allergic to levocetirizine or cetirizine. You should not take levocetirizine if you have end-stage kidney disease or if you are on dialysis. Any child younger than 12 years old with kidney disease should not take levocetirizine.

**OUR ADVICE :** DO NOT SELF MEDICATE
