Drug Facts

COMPOSITION : Each 5ml contains Lactulose soln equvale to Lactulose 3.335	PHARMACOLOGICAL CLASS : osmotic laxative.
---	---

NAME : Lactulose Solution3.335g/5

AVAILABLE AS : OSMOLOS

PHARMACOLOGICAL ACTION : Pharmacological action is by decreasing the intestinal production and absorption of ammonia. It has also gained popularity as a potential therapeutic agent for the management of subacute clinical encephalopathy. It is also a laxative for the treatment of chronic constipation.

USED FOR : is a laxative used to treat constipation. It may help to increase the number of bowel movements per day and the number of days you have a bowel movement. Lactulose is a colonic acidifier that works by increasing stool water content and softening the stool. It is a man-made sugar solution.

SIDE EFFECTS : A very common side effect of OSMOLOS lactulose, particularly at high doses, is diarrhoea. This happens in more than 1 in 10 people. Drink lots of fluids, such as water or squash, to avoid dehydration. Signs of dehydration include peeing less than usual or having dark, strong-smelling pee.

WARNINGS : You should not use OSMOLOS (lactulose) if you are on a special diet low in galactose (milk sugar).
Tell your doctor if you have ever had:
diabetes; or
if you need to have any type of intestinal test using a scope (such as a colonoscopy).
Tell your doctor if you are pregnant or breastfeeding

OUR ADVICE : DO NOT SELF MEDICATE
